

NEXUS
ACTIVITY BOARD

PERSPECTIVE

At-a-glance

NEWGATE
TECHNOLOGY

See the bigger picture

through a real-time progress display of patient journeys through theatre

Activity Board provides a visual display of theatre status, powered by information collected in Nexus Theatre. By showing the real-time status of all theatres with configurable colour coding, Activity Board highlights delays and bottlenecks, enabling corrective action to be taken. Combined with our innovative alerts system, Activity Board unlocks the next level of theatre efficiency gains.

Optimised for large-screen interactions

Activity Board has been designed for a large screen dashboard display, with dedicated views for Theatres, Recovery, Wards and Porters.

NEWGATE
TECHNOLOGY

Comprehensive, configurable overview of daily progress

Provides a dashboard summary of operation status for all theatres

Immediate alerts that inform key decision-making

Easily identifies potential late starts, early finishes and over-runs, to help maximise surgical contact time

Real-time visibility, at all times

Offers immediate progress updates to help theatre managers to reallocate resources and prevent delays

Multi-platform display options

Flexible web-based design supports use on PC, tablet, smart phone, and large screens
